

Northern Suburbs Op Shops and Second-hand Shops

Shopping second-hand is a great way you can reduce waste and help fuel the circular economy. In the NAWMA region, there are over 40 second-hand shops for you to visit.

- Buying second-hand is an important way you can extend the lifecycle of items.
- Buying second-hand items reduces the amount of natural resources and energy needed (as well as pollution created) to manufacture new items.
- Shopping at your local op shop or second-hand store reduces the number of items sent to landfill and also supports our local community.
